

Murdoch Navigate User Manual.

Installation Steps.

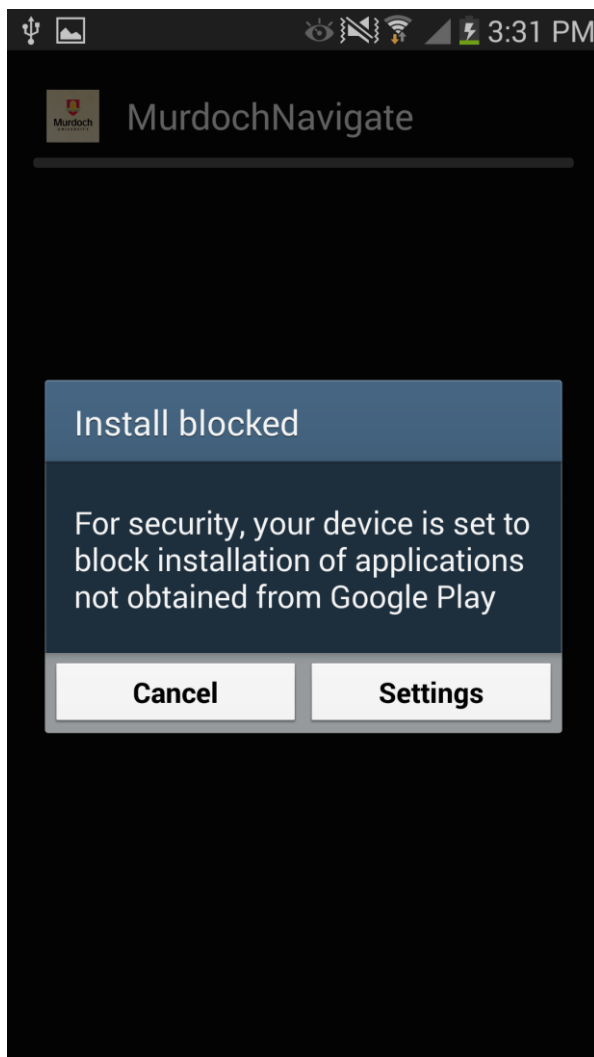

Step 1; Copy the MurdochNavigate.apk file into your android phone's root directory.

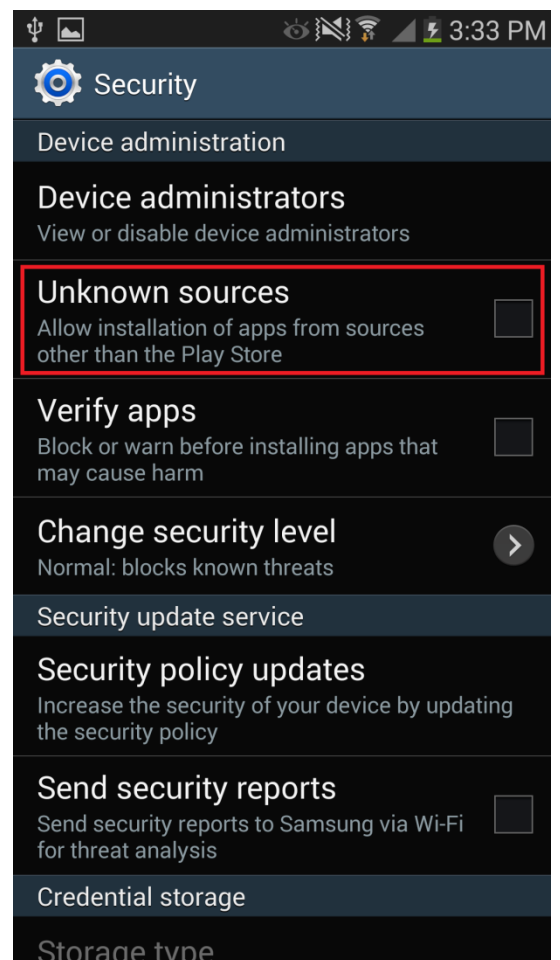

Step 2; Open file management (usually labeled “My Files”), enter “All files” and select Murdoch Navigate.

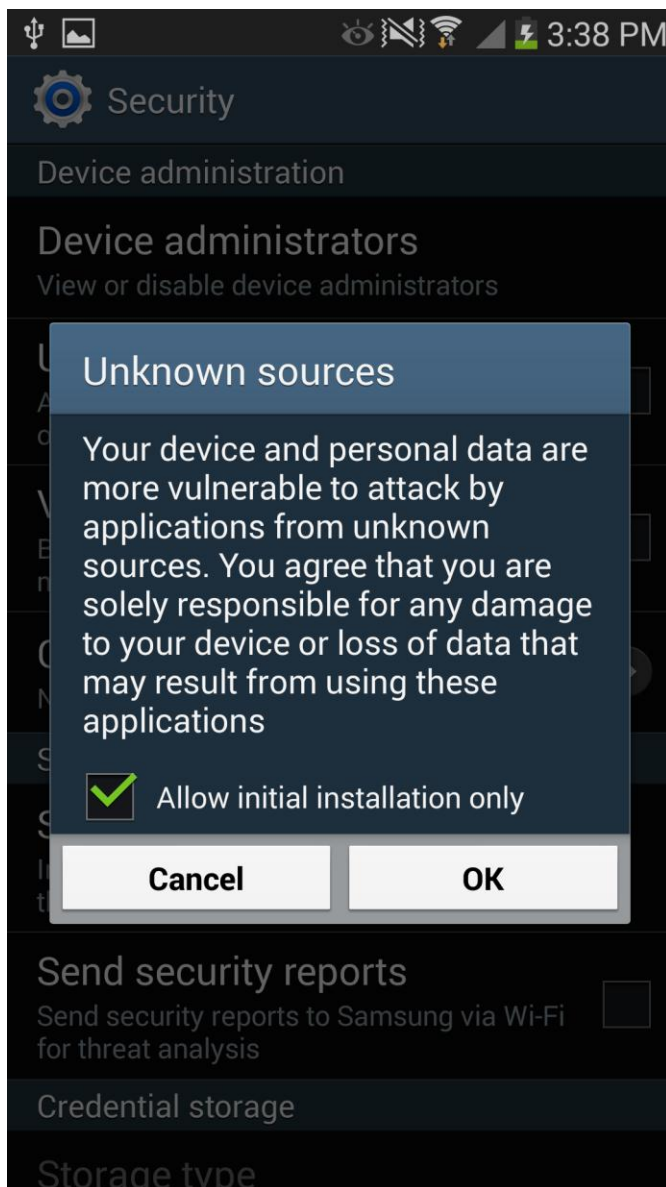

Step 3; If told the install is blocked, chose settings.

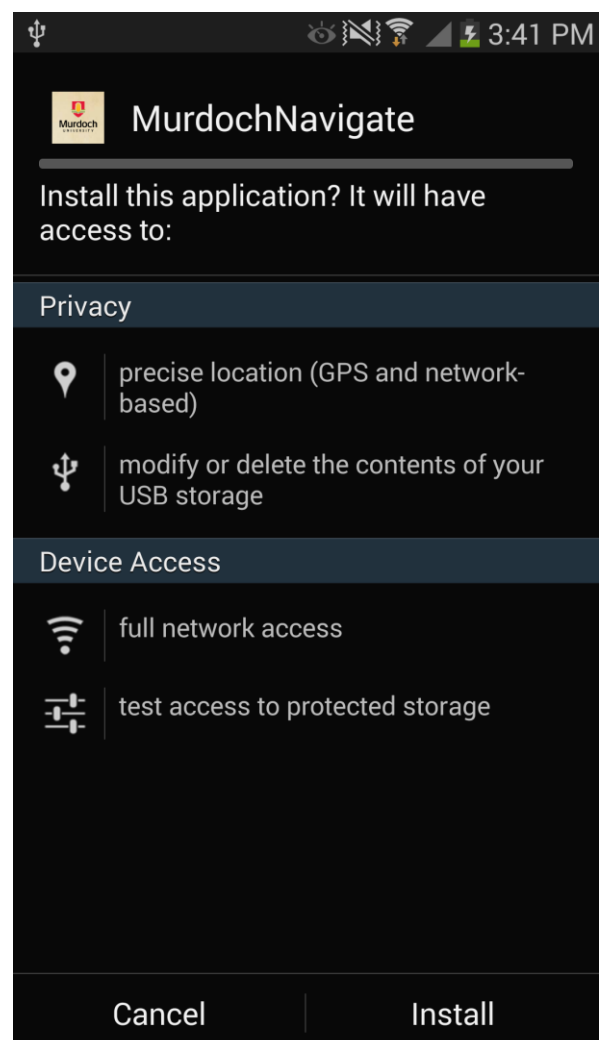

Step 4; in security settings, check "Unknown Sources"

Step 5; Select 'OK' when prompted.

Step 6; Select 'Install', then select 'Done' or 'Open'. The program will appear ready for use in your applications screen.

Usage Guide.

When first opened the program will enter Compass Tracking mode and follow the user.

The [TILT] button can be used to cycle between Compass Tracking, Tilted Free View and Birds-eye Free View modes. In any mode pinch the map to zoom. In either Free View mode swipe across the map to pan the view around campus.

To view the route to a location tap the drop down menu at the top left and then tap the location you wish you view. Slide the list's scroll bar up to view all options. The Buildings list shows supported locations.

For optimal results always make sure the phone is not within 15cm of any magnets or magnetized metals while using the application. Ensure the phone is held flat and level with the ground.
